Sterling Engineering is a full service steel works and metal works fabrication company, with facilities capable of producing more than 10,000 tons of steel annually, buttressed by a proven track record of supplying large, complex and bespoke fabrications.

Summary

"TO BE THE MOST PREFERRED STRUCTURAL STEELWORK AND METALWORK SUPPLIER, FABRICATOR AND INSTALLER"

Sterling Engineering excels across the full range of structural steelworks, from design, fabrication and installation of portal frames, roof trusses, lift shafts, linkways and linkbridges, steel frames and canopies.

Description

QUALITY. EFFICIENCY. RELIABILITY.

These are qualities that enable Sterling Engineering to transform steel to strength, metal to muscle.

Since our inception in 1994, Sterling Engineering has been providing valued structural steel solutions to the construction and offshore marine industries of Singapore. In

our two decades of business, we have assisted our clients to prevail over the most challenging of projects.

Through it all we've prioritised Quality, Efficiency and Reliability as the cornerstone of our service. It means we're always focused on getting the job done. It also means our clients trust us to deliver, over and over again.
