MINE STRUCT Pty Ltd is a multidisciplinary construction company offering a full range of building, civil, construction and project management services in remote and regional areas of Australia. Our highly qualified team possess an abundance of industry specific knowledge and practical experience to provide specialist delivery of our clients projects.

Summary

Our highly qualified team possess an abundance of industry specific knowledge and practical experience to provide specialist delivery of:

- . Non-Process Infrastructure (NPI) . Cyclical Maintenance
- . Accommodation Facilities . Remote / Regional Commercial
- . Civil Works . Remote / Regional Residential

Our strategy is simple - provide solutions from concept to

completion that enable us to build long lasting relationships and trust with our clients. A flexible and honest approach compliments our ability to deliver projects in the following form:

- . Construction Only . Project Management
- . Fixed Lump sum contracts . Design and Construct
- . Construction Management . Client Representation

Description

NPI

BUILDING NON-PROCESS INFRASTRUCTURE CAPABILITIES

MINE STRUCT has proven knowledge, expertise and workforce capability to deliver complex

Non-Process Infrastructure (NPI) projects in any area. We expertly manage all aspects of NPI, including structural steel, electrical, hydraulic, mechanical and civil works to provide a total end to end solution, from concept to completion.

We provide a large range of NPI including, but not limited to:

- . Accommodation Camps . Offices and Administration Complexes
- . Maintenance Sheds . Emergency Services Facilities
- . Vehicle Workshops . LV and HV Wash Down Bays
- . Logistics Warehouses . Septic Leach Drains and Spray Fields
- . Laboratory and Sample Prep Buildings

Our NPI projects are designed to withstand extremes in temperature and climate and comply fully with design standards required in cyclonic regions. The MINE STRUCT

team can offer a wide range of prefabricated modular constructions options, in addition to insitu built construction on site. Both forms of delivery are compliant at all times with the Building Code of Australia, as well as specific client requirements.

In-house technical and workforce capability allows MINE STRUCT to deliver both Design and Construct (D&C) or Engineer Procure and Construct (EPC) of a range of non-process infrastructure, with options including:

- . The innovative Early Contractor Involvement (ECI), working with the client from concept to delivery.
- . Detailed design documentation, from advanced concept to finalization.
- . Competitive D&C/EPC from concept to design

FACILITIES

BUILDING ACCOMMODATION CAPABILITIES

MINE STRUCT understands how critical high-quality accommodation and amenities can be in recruiting and retaining a loyal workforce. Our expert's early involvement in

the design of your project will allow MINE STRUCT to build in greater flexibility and functionality to your buildings to suit multi-purpose use should your project require it. Additional backbone services installations can be pre-installed during initial construction to enable conversion of your buildings to suit your requirements and budget.

MINE STRUCT offers the full range of accommodation facilities and villages, including:

- . Temporary facilities to get your employees operating on site as soon as possible. These can include exploration camps and facilities, temporary accommodation, ablutions and kitchens.
- . Permanent accommodation modules, retail shops, kitchens, wet and dry mess areas, and laundries.
- . Infrastructure, including medical centers, waste water and water treatment plants, roads and telecommunications.

CIVIL CAPABILITIES

MINE STRUCT Building has the practical experience, local knowledge and skilled workforce to deliver a large scope of civil works, regardless of complexity or location.

The MINE STRUCT head office in Perth positions the Company well to manage the ebbs and flows of project delivery across Western Australia, and to access a stable and productive workforce of locally based and FIFO

employees.

Our civil team to provide services including:

- . Bulk and detailed earthwork
- . Bulk concrete - foundations, walls and structures
- . In-ground services, including HDPE welding, HV/LV electrical, control cabling and communications
- . Fire, potable, waste and process water
- . Retaining structures
- . Fire, potable, waste and process water
- . Retaining structures
- . Process watering and dewatering
- . Septic tanks and leech drains
- . Storm water
- . Site drainage

COMMERCIAL CONSTRUCTION

The MINE STRUCT team is built around specialist staff who have practical backgrounds in various disciplines within the construction industry. This includes personnel with extensive exposure to a broad range of commercial construction projects around Western Australia, in both outer metro and remote areas.

These individuals bring high level knowledge in areas including, health, education, defence and warehousing. As a remote building specialist, MINE STRUCT

Industries Served

- > Construction & Engineering
