Previous Significant Projects

2011

Gorgon Janz Pipeline Project
\$2,000,000

Client: Allseas Construction Contractors

Provided dive support personnel, supervision, equipment and vessels for the installation of new trunk-line and associated MEG lines (x6) from HDD site for continuation of pipe-lay program.

2012

North Rankin Redevelopment Project
\$2,000,000

Client: Woodside Energy

Works for this completed project was the removal of 4 pre-installed hydraulic jack assemblies from NRB jacket by means of thermal lance by air divers; The Diving was conducted on site at the NRB platform.

2013

Cape Labert Navigation Aid Installation
\$1,000,000

Client: John Holland Group For Rtio

The installation of six(6) x 90t 'Spar' type Navigation Aids at Cape Lambert in support of the RTIO 380Mt Project

2014

Wheatstone Lng Product Load Out Facility
\$2,000,000

Client: Bam Clough Jv

Installation of cathodic protection anodes, Thermal cutting and removal of construction assets, and cyclone mooring inspections. This extensive program is anticipated to continue through the 2nd and 4th quarters of 2015

2014

Wheatstone Trunkline Installation Project
\$6,000,000

Client: Allseas

Oceanic Offshore was enlisted to assist with the necessary shallow water commercial diving scopes in support of their field installation activities. These diving activities are largely based around the following: installation of pipeline and mattresses for the 44 inch pipeline to cross over an existing field line (Roller/Skate field), and the associated pipeline recovery and buoyancy.
