

COVID-19 RESPONSE APP

The outbreak of Coronavirus (COVID-19) is a global pandemic with far-reaching impacts that have forced the closure of many businesses and industries in a bid to contain the spread. The safety of staff, contractors, customers and any individual that has a touchpoint with business operations should be at the forefront of every operating company's thinking.

A burning question for businesses still operating during the resulting isolation period is:

What do we need to do to be legally compliant?

COVID-19 Response App

COVID-19 Response App is a user-friendly application that allows easy, automated distribution of questionnaires to workers, contractors and visitors to job sites.

Many businesses are conducting this screening process manually, leading to decreased productivity and operational inefficiencies.

The COVID-19 Response App portal means that those planning to visit your job sites or premises can fill out a simple web-based form and submit, with automated approval or alerts to management, should the worker or visitor not pass a COVID-19 risk assessment.

If your business still has to interact with others.

COVID-19 Response App is available for FREE to any business with 50 users or less, charity groups and not-for-profit organisations.

For larger enterprises, COVID-19 Response App is offered at a significantly discounted rate, with costs scaled depending on workforce size. See over for more info

Enable your isolated workforce

Facilitate real-time check-ins and health updates from staff in operation during isolation instigated by pandemic.

Take action during change

Automated status updates from staff and visitors accessing sites and outlets allows you to take immediate action to mitigate risk.

Assist workforce re-entry

Certify approved workers and visitors, allowing them site access quickly, while reducing the risk of contagion.

PRODUCT INFORMATION

How it works

COVID-19 Response App is a daily checklist feeding into a risk matrix with pre-determined outcomes and messages displayed on an easy-to-view web dashboard.

It's not specific to site travel, just for companies wanting to keep on top of employee health and wellness so they can take appropriate action should any staff member show symptoms (self-isolate, health check etc).

Key benefits

COVID-19 Response App offers a range of benefits to large companies with multiple job sites, premises and mobile workers including:

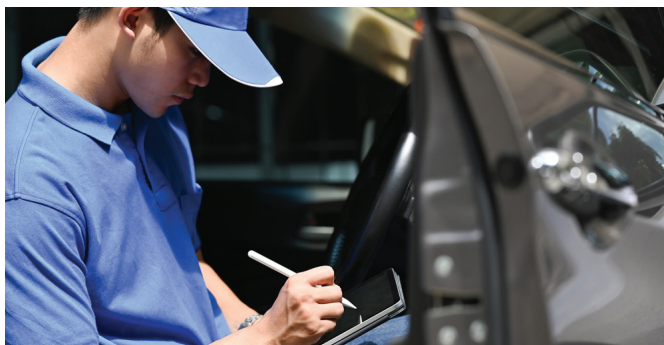

- ✔ Ensuring the safety of staff, contractors and customers
- ✔ Automated flagging of any risks
- ✔ Eliminating manual processes
- ✔ Simple to complete questionnaires
- ✔ Mitigation of a challenging pandemic situation
- ✔ Total compliance
- ✔ Transparency and trust

COVID-19 Response App is a light, easy to deploy and operate web-based app that will allow businesses to keep their wheels turning during this time of crisis.

Mental health checks included in the COVID-19 Response App technology

These are stressful times for everyone and managers need to know when their staff and contractors are struggling.

Included in the questionnaire is a simple mental health check where workers select one of three simple images to show management how they are feeling. This is an effective way to gauge how a worker or contractor is feeling without confronting or personal lines of questioning. Functionality can also be added to automatically refer these workers to in-house counselling and support services.

Risk Management

The risk profile of every company still operating has been significantly raised because of the COVID-19 pandemic. Measures need to be put in place to shield workers, visitors, contractors and customers from contracting the virus. COVID-19 Response App forms are legal declarations, which means you are not only ensuring safe operations and compliance but meeting your legal obligations during this pandemic.

Management Transparency

As the director of a company, you may have sites, offices and business premises located around the country - or even the world.

Each individual site has its own individual manager who you would entrust with the responsibilities of protecting staff and contractors from the threat of COVID-19. But what tangible proof do you have that this compliance is happening?

COVID-19 Response App provides complete visibility of COVID-19 safety compliance across all sites on one single platform.

COVID-19 Response App is built on proven architecture

While the COVID-19 Response App is new, the development behind the software is not. Powered by IONYX in partnership with QMI Solutions, the COVID-19 Response App has been developed on existing existing architecture used to create the successful **Journey Management System (JMS)**, **OPS**, **Fly2Work** and **DigitalForms** platforms which are in use by Fortune 500 companies such as **Shell QGC**, **Rio Tinto**, **Anglo American** and many other businesses globally.

QMI Solutions owns ICN in Queensland and is part of the ICN National Network, which is deploying this solution to help businesses navigate these trying times.
